

Alum Rock/Santa Clara Bus Rapid Transit (BRT) Project
Construction Update
March 29, 2016 *(revised)*

Overview

The Alum Rock/Santa Clara BRT project will provide a rapid transit bus service connecting East San Jose to the Downtown area using specialized vehicles and the enhanced BRT stations. The new stations will have multiple security cameras, enhanced station lighting, new street and pedestrian lighting, live schedule displays, weather protection and art features.

Construction of the Downtown and City Hall BRT Stations on Santa Clara Street will begin in mid-April and continue through mid-summer 2016. The east and westbound Downtown stations will be located between 1st and 2nd Streets, and the east and westbound City Hall stations will be located between 5th and 6th Streets. There will be permanent impacts to parking, deliveries, and traffic directly in front of each station area, and temporary impacts to parking, bus stops, and loading zones on Santa Clara Street between Market and 7th Streets. Future construction details for specific areas will be provided to the downtown community in advance.

March Community Meeting

Join VTA and City of San Jose Councilmember Peralez for the project community meeting! The discussion will focus on Santa Clara Street construction of the BRT stations located between 1st and 2nd Streets and in front of City Hall between 5th and 6th Streets. Learn about the schedule and the planned work to complete the BRT Stations.

Downtown and San Jose City Hall Construction

Tuesday, April 5, 2016

6:30 p.m. – 7:30 p.m.

San Jose City Hall – West Wing
